THIRD QUARTERLY REPORT
FOR THE NINE MONTHS ENDED
31 DECEMBER 2017

CHARACTERISTICS OF THE GROWTH ENTERPRISE MARKET (“GEM”) OF THE STOCK EXCHANGE OF HONG KONG LIMITED (THE “STOCK EXCHANGE”)

GEM has been positioned as a market designed to accommodate companies to which a higher investment risk may be attached than other companies listed on the Stock Exchange. Prospective investors should be aware of the potential risks of investing in such companies and should make the decision to invest only after due and careful consideration. The greater risk profile and other characteristics of GEM mean that it is a market more suited to professional and other sophisticated investors.

Given the emerging nature of companies listed on GEM, there is a risk that securities traded on GEM may be more susceptible to high market volatility than securities traded on the Main Board and no assurance is given that there will be a liquid market in the securities traded on GEM.

Hong Kong Exchanges and Clearing Limited and the Stock Exchange take no responsibility for the contents of this report, make no representation as to its accuracy or completeness and expressly disclaim any liability whatsoever for any loss howsoever arising from or in reliance upon the whole or any part of the contents of this report.

This report, for which the directors (the “Directors”) of New Wisdom Holding Company Limited (the “Company”) collectively and individually accept full responsibility, includes particulars given in compliance with the Rules Governing the Listing of Securities on GEM of the Stock Exchange (the “GEM Listing Rules”) for the purpose of giving information with regard to the Company. Notes:

1. BASIS OF PREPARATION

- (a) These unaudited condensed consolidated quarterly results have been prepared in accordance with all applicable Hong Kong Financial Reporting Standards (“HKFRSs”), Hong Kong Accounting Standards and Interpretations issued by the Hong Kong Institute of Certified Public Accountants (“HKICPA”), accounting principles generally accepted in Hong Kong and the disclosure requirements of the Hong Kong Companies Ordinance and are prepared under the historical cost convention and the disclosure requirements of the Rules Governing the Listing of Securities on the GEM of the Stock Exchange.

These unaudited condensed consolidated quarterly results should be read in conjunction with the consolidated financial statements for the year ended 31 March 2017, which have been prepared in accordance with HKFRSs.

These unaudited condensed consolidated quarterly results have been prepared in accordance with the same accounting policies adopted in the 2017 annual financial statements, except for all the new and revised HKFRSs issued by the HKICPA that are relevant to its operations and effective for its annual period beginning on 1 April 2017. The adoption of these new and revised HKFRSs did not result in significant changes to the Group’s accounting policies, presentation of the Group’s condensed consolidated quarterly results and amounts reported for the current period and prior periods.

(b) Adoption of the going concern basis

When preparing the unaudited condensed consolidated quarterly results, the Group’s ability to continue as a going concern has been assessed. These unaudited condensed consolidated quarterly results have been prepared by the Directors on a going concern basis notwithstanding that the Group incurred a loss of HK\$22,059,000 for the period ended 31 December 2017 and as of that date, the Group had net current liabilities of HK\$24,688,000 as the Directors considered that:–

- (1) Mr. Tang Sing Ming Sherman (“Mr. Tang”), who is the sole beneficial owner of the convertible bonds issued by the Company in the aggregate outstanding principal amount of HK\$40,000,000 and provided loans to the Group of approximately HK\$114,099,000 as at 31 December 2017, will provide continuing financial support to the Group;
- (2) Mr. Chan Kin Chun Victor (“Mr. Chan”), the controlling shareholder of the Company, will provide continuing financial support to the Group; and
- (3) Upon completion of the rights issue took place on 14 June 2017, the Company raised approximately HK\$100 million, before expenses, by way of allotting and issuing 1,388,725,000 Rights Shares at the subscription price of HK\$0.072 per Rights Shares, on the basis of one (1) Rights Shares for every two (2) existing Shares held on 19 May 2017.

After taking into consideration of above factors, the Directors are satisfied that the Group will have sufficient financial resources to meet its financial obligations as they fall due in the foreseeable future and consider that it is appropriate for the unaudited condensed consolidated quarterly results to be prepared on a going concern basis since there are no material uncertainties related to events or conditions that may cast significant doubt upon the Group's ability to continue as a going concern.

MANAGEMENT DISCUSSION AND ANALYSIS

The Group's unaudited revenue for the nine months ended 31 December 2017 amounted to HK\$227.5 million (2016: HK\$250.0 million), representing a decrease of 9.0% compared with the same period of the last financial year. Net loss attributable to owners of the Company decreased by HK\$12.1 million to HK\$21.7 million as compared with the same period of the last financial year.

Industry Overview

In 2017, geopolitical risks continued to be amplified as black-swan events remain the prime global concerns. US President Trump's recognising of Jerusalem as the capital of Israel heightened Middle East political tensions. The tense standoff between North Korea and the United States continued to escalate; whilst Catalan independence referendum, Brexit, Italy's decision to dissolve the parliament for general elections, as well as France and Austria's voting for younger leaders have all contributed to the fact that right-wing convictions still affected the Eurozone. These events have created uncertainties to the global economy.

For domestic economy, China benefitted from the recovery of real estate market, among other things, and witnessed a 6.9% growth in gross domestic products ("GDP") in 2017, which met market estimate. Food and beverage sector and other services trades continued to improve, with the sector presenting significant growth potential. However, the sector has become increasingly diversified and fragmented with changing consumption pattern and intensified competition.

At the local level, Hong Kong's GDP expanded by 3.6% in the third quarter of 2017, marking the fourth consecutive quarter of above-trend economic expansion. The external demand stayed vibrant, supported by the broadly benign global economic conditions. Domestic demand attained solid growth, led by the brisk expansion of private consumption. Therefore, the government revised upwards its whole-year GDP growth forecast from 3.7%. Nevertheless, the food and beverage sector of the city continues to endure pressures of rising labour costs, high turnover rate and increasing rental rates, as the market conditions have shown no substantial improvement.

The majority of the Group's revenue is derived from the provision of food and beverage services in Hong Kong. However, there has been a reliance on Chinese mainland visitors from the sector due to Hong Kong's close linkage with Mainland China. With a changing consumption pattern from mainland visitors, and a slowdown in consumption growth, we have been affected. Hong Kong's food and beverage sector strives to cope with these economic headwinds, in order to improve the situation of continued margin squeeze.

Business Review

High rental and labour costs are inevitable challenges to most industries without exception to the food and beverage industry, in which high food and utilities costs are additional challenges. Customers are price sensitive and their preferences are ever changing, the competition in food and beverage industry is always intense, a small number of profit-making participants are working hard to maintain their profits while most of the rest market participants are primarily striving hard for survival. In the meantime, we have to keep abreast of developing trends and changing consumption patterns, in particular, the challenges from the rapid rise of e-commerce and online-to-offline deliveries. Amid this unfavorable business environment in recent years, we continue to strive for survival and growth, through strengthening our attractiveness to new and old customers and hence retaining loyal customers, by frequent menu revamping and consistent provision of quality food and services.

The Group's food and beverage businesses are a collection of Japanese food-related concepts in the Greater China region, including the restaurants, café and cake shops under the Japanese brand of Italian Tomato, the Japanese Tonkatsu under the brand of Ginza Bairin, the Japanese curry specialty stores under the brand of Shirokuma Curry and the Japanese Izakaya under the brand of Enmaru.

Italian Tomato, our major brand of restaurants, café and cake shops, is still a big contributor to the Group's revenue. Through years of effort on product innovation, menu re-engineering and customer relationships, Italian Tomato has already become a well-recognized brand in Hong Kong. Leveraged on our success in Hong Kong, we expended Italian Tomato's network to PRC and Taiwan. However, the performance during the period under review is not satisfactory to the management and the total shop number has been decreased from 42 to 40 during the period under review. The management believes that after years of establishment and presence in Hong Kong and PRC, a thorough repositioning is needed for Italian Tomato, the closure of certain cake shops now is actually expecting a fresh return. On the other side of Taiwan Strait, the management is trying to release the brand's market potential and uplifting its performance.

Ginza Bairin, the Japanese Tonkatsu, has 2 shops in Hong Kong and 1 shop in the PRC as at 31 December 2017. As the first shop in Shanghai, after years of operation, is closed for renovation for a period of time, the revenue of this brand is lower than the corresponding period of last year. The renovation has been completed and the shop has been reopened in the late December 2017, therefore better contribution to the Group is expected in the coming quarters.

Shirokuma Curry has no material change during the period under review and maintains 2 shops in Hong Kong and 7 shops in the PRC as at 31 December 2017. Meanwhile, its licensing business has made good progress and has 5 franchise shops as at 31 December 2017. As Shirokuma's network becomes larger, the management will concentrate on its quality control. Although the history of Shirokuma Curry license operation is still short, its long term growth is optimistic.

Enmaru, the Japanese Izakaya, still encounters with stiff competition but manages to keep 4 shops as at 31 December 2017. Shortage of Japanese staff is a problem to the growth of Enmaru, the management is actively searching for Japanese staff because Japan element is important to this dining concept. Although Enmaru's current contribution to the Group is not satisfactory, the management expects Enmaru's growth will be back on its track once an innovative dining ambiance is created to this brand.

Future Prospects

Although there has been a slowdown of the increase in lease rates of commercial space, the ever upward adjustment of statutory minimum wage shows its impact on the operating cost at the same time. The Group anticipates that the operating environment of food and beverage industry will remain difficult in the short term.

Looking ahead, global economic risks are still evident. With the US Federal Reserve raising interest rate and shrinking its balance sheet, liquidity of global markets is expected to be affected. Political risks continue to loom large and influence the oil, commodity and foreign exchange markets, and thereby the economy. China and Hong Kong enjoy a rather stable economy; however, the Group is prudent about the impact of future interest rate hike on economic growth and rental rate. Fortunately, with the opening of Hong Kong-Zhuhai-Macau Bridge and high-speed railway, more visitors from Guangdong Province and Pearl River Delta Region will be brought to Hong Kong, thereby boosting the demand for local food and beverage sector. The Group will look into different measures to cope with the changing business environment of the industry and consumption pattern, timely adjust its strategies to enhance its efficiency and improve its operating results.

While the management intends to continue the existing principal businesses of the Group, the management is reviewing the existing businesses and the financial positions of the Group for the purpose of formulating business plans and strategies for the future business development of the Group. In this regard, the management may explore business opportunities and consider whether any asset disposals, asset acquisitions, business rationalisation, business divestment, fund raising, restructuring of the business and/or business diversification will be appropriate in order to diversify the Group's existing business, broaden the Group's income stream and enhance the long-term growth potential of the Company.
